I have given copies of each of these reports for your review. I think we should discuss each report so that I can forward any comments to Elizabeth Hill and have AGI Tech complete the reports. (Reports are in your mailbox attached to copy of this e-mail).

Pat:

*you already have this one.*

I need to wrap up the site assessment work orders we did for you. I would like to get AGI any comments we have on the Aeroflight and NE Hangar reports. The NE Hangar Report does not recommend additional investigation and I think we should tell them to final the report. Do you agree?

The Aeroflight report recommends drilling to determine if there is contamination. Call me so we can discuss this one.

Thanks.

Elizabeth Hill
